Subject: Friable Asbestos landfills
Date: Sunday, April 29, 2018 5:18:29 AM

You spoke with (b) (6) Brian Benedict when the EPA was getting ready to designate Oorfino, Idaho a hazardous waste clean-up site and suggested we might want to receive it. You may know, Valley Waste Disposal, LLC. in Lewiston can now take friable asbestos. However, we have not received any and want to let contractors know we can accept both friable and non-friable asbestos.

I was hoping you could either give me the following information or let me know how to get it.

1. A list of landfills that can take Friable Asbestos, maybe in Idaho Washington, Oregon and Montana.
2. If such a thing exists, a list of contractors that have been approved to remove friable asbestos from buildings, machinery, etc.

The EPA websites have lots of guidelines, etc.. but using their search engines, I can not find a list of landfills or contractors for this area. I am curious if it exists, is Valley Waste Disposal on it?. If not, how do we get on it.

I would really appreciate your help.. Thank you Diane Stephens
